## REPORT OF ANIMALS USED BY OR UNDER CONTROL OF RESEARCH FACILITY (Attach additional sheets if necessary or use APHIS FORM 7023A)

A. Animals Covered By The Animal Welfare Regulations	B. Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	C. Number of animals upon which teaching, research, experiments, or tests were conducted involving no pain, distress, or use of pain- relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress in these animals and the reasons such drugs were not used must be attached to this report)	F. TOTAL NO. OF ANIMALS  (Cols. C + D + E)
4. Dogs		4	175		179
5. Cats					
6. Guinea Pigs	54	189	121		310
7. Hamsters		161	244		405
8. Rabbits		93	253		346
9. Non-Human Primates	48	7	83		90
10. Sheep			96		96
11. Pigs		2	375		377
12. Other Farm Animals					
13. Other Animals					
Bat	75		26		26
Gerbil	3	145	95		240
Chinchilla	9		41		41

## ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all the exceptions is attached to this annual report. In addition to identifying the IACUC-approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

### APHIS Form 7023 Column E Explanation

This form is intended as an aid to completing the APHIS Form 7023 Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

---

1. Registration Number: 43-R-0002

2/3. Species (common name) & Number of animals used in this study:

Guinea Pigs (1)

Rabbits (29)

4. Explain the procedure producing pain and/or distress.

Explanations for ?E? Pain Classification - USDA/APHIS year 10/00-9/01

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Explanations for ?E? Pain Classification - USDA/APHIS year 10/00-9/01

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

1. Registration Number: 43-R-0002 / 1518

2/3. Species (common name) & Number of animals used in this study:

Guinea Pigs (1)

Rabbits (29)

4. Explain the procedure producing pain and/or distress.

Explanations for ?E? Pain Classification - USDA/APHIS year 10/00-9/01 During the USDA animal year of October 1, 2000 through September 30, 2001, 29 rabbits were used in tests causing pain or distress. Six rabbits were used in a Primary Eye Irritation study in which severe swelling of the tissue surrounding the eye resulted after only an hour of exposure. Since the pain relieving medication we had available has a relatively short effective period, we chose not to use it and instead rinsed out the test sample from the test eyes (with warm sterile saline) at the one hour time point, instead of the required 24 hour time point. The swelling had diminished considerably by 16 hours later and the rabbits did not appear to be in any pain or discomfort at that time or later in the test. Even though the test material did not remain in the eyes for the required 24 hours, the sample was deemed to be an eye irritant Six rabbits were used in polyclonal antibody production studies involving the use of Freund?s Complete Adjuvant. These animals did not appear to be in pain from the FCA use even though lesions did form on most rabbits. When lesions appear on the rabbits, we rinse their backs with warm sterile saline, but do not provide any other pain relieving procedures, unless recommended by the consulting veterinarian. Seventeen rabbits were used in pyrogen tests involving a product that resulted in exposed raw skin at the ear?s injection site. It has also been noted that if the product is not fully injected intravenously, and infiltrates into the surrounding tissue of the ear, that necrosis of the injection area may occur. Care is taken to ensure that the needle has proper intravenous placement, that the product does not drip onto the ear and that the ear is properly occluded following the sample injection. (The pyrogen tests, USP 24 <151> and 21 CFR 610.13 do not allow for the administration of pain-relieving drugs due to their potential to interfere with the test.) Although not used in a test or a procedure, one guinea pig received an ?E? classification at the time it was logged out of the colony. We euthanized this guinea pig (during its acclimation period) upon finding it with a swollen foot and leg bone protruding from the skin.
